

Double Wheel Cutter

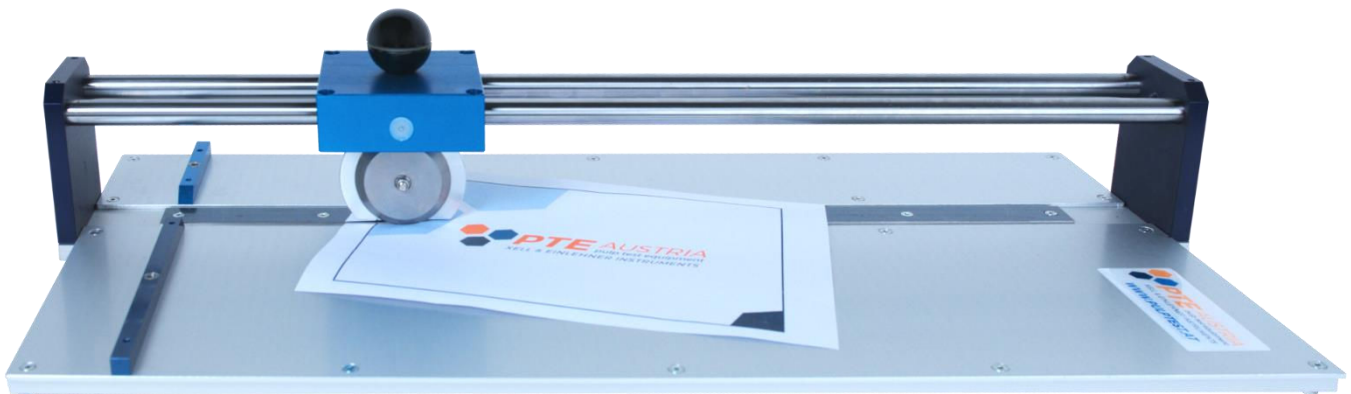

Code: N.303.xxx & N.304.xxx

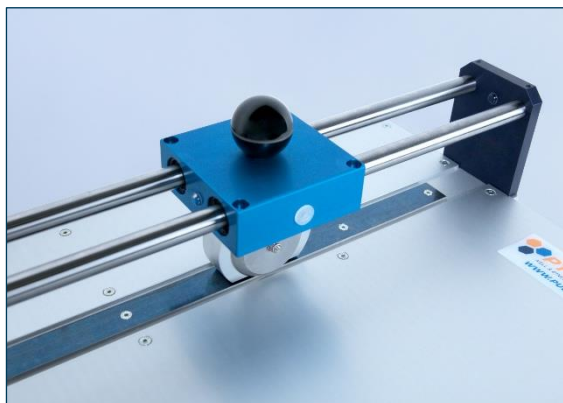

Usage

To easily prepare paper and board sample strips.

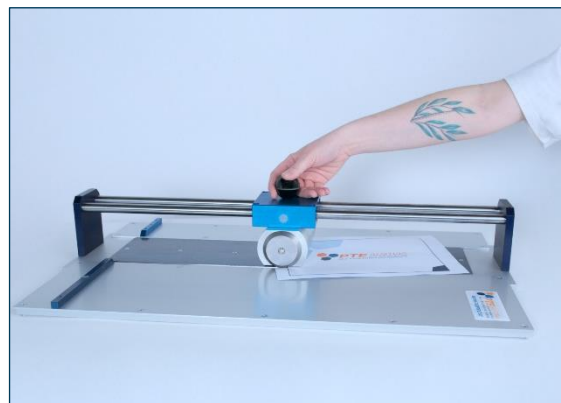

Applicable standards

- ISO 1924
- SCAN P38

Maintenance free cutting slide

Easy & userfriendly cutting process

Device description

Introducing the Double Wheel Cutter, a practical solution for effortlessly preparing paper samples for tensile tests and similar applications. Simply push the wheels over the material, and the blades, safely positioned under a cover, glide smoothly on two sliding bars. The cut sample can be easily removed from the guide, offering a straightforward and efficient process. Available in two different lengths, our cutter provides a practical and reliable solution for your sample preparation needs.

Features

- sturdy construction made of corrosion-resistant material
- practically maintenance free (greasing the slide possible through grease nipples in case of need)
- precise cutting blades
- fast & simple cutting process
- sample alignment stop
- CE certified

Models

Code	Length 350 mm	Code	Length 550 mm
N.303.127	sample width 12.7 mm	N.304.127	sample width 12.7 mm
